Our research chairs

The Exploration and Innovation Open Lab

Open Lab Exploration Innovation is a flexible system of interaction between researchers and practitioners (managers, entrepreneurs, consultants) who wish to progress together around questions of exploration and innovation.

The Value and CSR Chair

The role of the “Value & CSR” chair is to study the link between the economic and financial value of companies and their degree of social responsibility.
The Health and Territories Chair

The Health and Territories Chair relies on a community of CleRMa researchers to question the diversity of relationships between health actors and their territories and intra- and inter-organizational cooperation models.
